

Your frontline HSE(Q) tool

PEAK SHIELD is an intuitive and easily accessible HSE(Q) reporting and management tool, designed to ensure transparency and enhance performance tracking for all stakeholders.

The tool offers flexibility to fit project and company requirements, providing clear insights into case statuses and case management flow.

Focused on accountability and ownership, PEAK SHIELD streamlines case management for efficient action implementation and progress tracking.

Reporting HSE(Q) events

Simplified and user-friendly platform for HSE(Q) reporting with global application

- HSE(Q) observations and incidents can be reported by both employees and subcontractors
- Language selection can be determined based on unique project requirements
- The standard features are inherently flexible for providing bespoke solutions as required

Case management

Minimize risks and mitigate impacts with a streamlined case management overview focussed on follow-up actions

- Customised rights, based on user responsibilities, are provided for multiple user categories
- Each registered case is assigned to specified users & owners, with built-in follow-up actions
- A clear overview of all the cases & actions assigned to each user, along with their status, is shown
- Progress is easily tracked within convenient display & dashboards

Data analysis & insights

Receive regular updates and perform trend analysis utilising state-of-the-art toolkits

- Readily accessible data through easy-to-use dashboards with visual displays (powered by Power BI)
- Tailored reports with the option to customise for trend analysis
- All reports are aligned with the company policies and standards
- GDPR-compliant personal data protection
