

Your frontline HSE(Q) tool

PEAK SHIELD is an intuitive and easily accessible HSE(Q) reporting and management tool, designed to ensure transparency and enhance performance tracking for all stakeholders.

The tool offers flexibility to fit project and company requirements, providing clear insights into case statuses and case management flow.

Focused on accountability and ownership, PEAK SHIELD streamlines case management for efficient action implementation and progress tracking.

Reporting HSE(Q) Events

Simplified and user-friendly platform for HSE(Q) reporting with global application

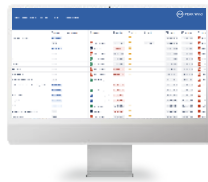

- HSE(Q) observations and incidents can be reported by both employees and subcontractors
- Language selection can be determined based on unique project requirements
- The standard features are inherently flexible for providing bespoke solutions as required

Case Management

Minimise risks and mitigate impacts with a streamlined case management overview focussed on follow-up actions

- Progress is easily tracked via user-friendly displays
- Customised rights, based on user responsibilities, are provided for multiple user categories
- Each registered case is assigned to specified users & owners, with built-in follow-up actions
- A clear overview of all the cases & actions assigned to each user, along with their status, is shown

Data Analysis & Insights

Receive regular updates and perform trend analysis utilising state-of-the-art toolkits

- Visualised trend analysis provides insights for data-driven decision-making
- Customisable KPIs, available on request, align with company policies and requirements
- Exportable datasets enable in-depth analysis
- Secure data handling and access controls ensure GDPR compliance and meet industry information security standards
